

BR Standard Class 5 Green Livery Data

This table shows the painting dates for BR Standard Class 5MT when they were painted into express green livery with orange / black lining. Source for this data is the RCTS book "BR Standard Steam locos Volume 2". This source does not guarantee date information to be accurate but is probably the best resource of information available.

Loco numbers marked red were known to have a WR route restriction red spot below the cabside number.

Some variations to the position of the valance orange lining are known to have occurred between Swindon and Eastleigh. The Aster model is per Eastleigh practice but could be altered to Swindon style very simply.

No photographic evidence has indicated the early style of tender totem was applied. All Aster green models & kits will have the later style tender crest applied.

Loco	Date to Green	Painted at	Loco	Date to Green	Painted at
73001	Nov-58	Swindon	73036	Apr-59	Swindon
